PROFILE

Front-end Developer with 3 years of hands-on experience in building scalable and user-friendly web applications, with a strong focus on developing MVPs for early-stage startups. Proven expertise in designing and implementing SaaS solutions from the ground up, with several successful projects delivered to clients. Solid foundation in software engineering principles, combined with a deep understanding of modern frontend technologies. Demonstrated ability to work efficiently in dynamic, fast-paced environments, including hackathons and agile teams. Passionate about creating clean, maintainable code and delivering impactful digital products.
